```
Doing the Right Thing
[01]
0001
      This is a course about Justice and we begin with a story
0002
      suppose you're the driver of a trolley car,
0003
      and your trolley car is hurdling down the track at sixty miles an hour
0004
      and at the end of the track you notice five workers working on the track
0005
      you tried to stop but you can't
0006
      your brakes don't work
0007
      you feel desperate because you know
0008
      that if you crash into these five workers
      they will all die
0009
0010
      let's assume you know that for sure
0011
      and so you feel helpless
0012
      until you notice that there is
0013
      off to the right
0014
      a side track
0015
      at the end of that track
0016
      there's one worker
0017
      working on track
0018
     you're steering wheel works
      so you can
0019
0020
      turn the trolley car if you want to
0021
      onto this side track
0022
      killing the one
0023
      but sparing the five.
0024
      Here's our first question
0025
      what's the right thing to do?
0026
      What would you do?
0027
      Let's take a poll,
0028
      how many
0029
      would turn the trolley car onto the side track?
0030
      How many wouldn't?
      How many would go straight ahead
0031
      keep your hands up, those of you who'd go straight ahead.
0032
0033
      A handful of people would, the vast majority would turn
0034
      let's hear first
0035
     now we need to begin to investigate the reasons why you think
```

```
0036
      it's the right thing to do. Let's begin with those in the majority, who would turn
0037
      to go onto side track?
     Why would you do it,
0038
      what would be your reason?
0039
      Who's willing to volunteer a reason?
0040
      Go ahead, stand up.
0041
      Because it can't be right to kill five people when you can only kill one person instead.
0042
0043
      it wouldn't be right to kill five
0044
      if you could kill one person instead
0045
      that's a good reason
0046
      that's a good reason
0047
      who else?
0048
      does everybody agree with that
0049
      reason? go ahead.
0050
      Well I was thinking it was the same reason it was on
0051
      9/11 we regard the people who flew the plane
      who flew the plane into the
0052
      Pennsylvania field as heroes
0053
0054
      because they chose to kill the people on the plane
0055
      and not kill more people
0056
      in big buildings.
0057
      So the principle there was the same on 9/11
0058
      it's tragic circumstance,
0059
      but better to kill one so that five can live
      is that the reason most of you have, those of you who would turn, yes?
0060
0061
      Let's hear now
0062
      from
0063
      those in the minority
0064
      those who wouldn't turn.
0065
      Well I think that same type of mentality that justifies genocide and totalitarianism
0066
      in order to save one type of race you wipe out the other.
0067
      so what would you do in this case? You would
0068
      to avoid
0069
      the horrors of genocide
0070
      you would crash into the five and kill them?
      Presumably yes.
0071
```

0072

okay who else?

```
0073
      That's a brave answer, thank you.
0074
      Let's consider another
     trolley car case
0075
0076
      and see
0077
      whether
      those of you in the majority
0078
      want to adhere to the principle,
0079
      better that one should die so that five should live.
0080
0081
      This time you're not the driver of the trolley car, you're an onlooker
0082
      standing on a bridge overlooking a trolley car track
0083
      and down the track comes a trolley car
      at the end of the track are five workers
0084
      the brakes don't work
0085
0086
      the trolley car is about to careen into the five and kill them
0087
      and now
0088
      you're not the driver
0089
      you really feel helpless
      until you notice
0090
0091
      standing next to you
0092
      leaning over
0093
      the bridge
0094
      is it very fat man.
0095
     And you could
0096
      give him a shove
0097
      he would fall over the bridge
0098
      onto the track
0099
      right in the way of
0100
      the trolley car
0101
      he would die
0102
      but he would spare the five.
0103
      Now, how many would push
0104
      the fat man over the bridge? Raise your hand.
0105
     How many wouldn't?
0106
     Most people wouldn't.
0107
     Here's the obvious question,
     what became
0108
0109 of the principle
```

```
0110
      better to save five lives even if it means sacrificing one, what became of the principal
      that almost everyone endorsed
0111
      in the first case
0112
      I need to hear from someone who was in the majority in both
0113
0114
      cases is
0115
      how do you explain the difference between the two?
0116
      The second one I guess involves an active choice of
0117
      pushing a person
      and down which
0118
      I guess that
0119
      that person himself would otherwise not have been involved in the situation at all
0120
      and so
0121
      to choose on his behalf I guess
0122
0123
      to
      involve him in something that he otherwise would have this escaped is
0124
0125
      I guess more than
      what you have in the first case where
0126
      the three parties, the driver and
0127
      the two sets of workers are
0128
0129
      already I guess in this situation.
      but the guy working, the one on the track off to the side
0130
0131
      he didn't choose to sacrifice his life any more than the fat guy did, did he?
0132
      That's true, but he was on the tracks.
0133
      this guy was on the bridge.
0134
      Go ahead, you can come back if you want.
0135
      Alright, it's a hard question
0136
      but you did well you did very well it's a hard question.
0137
      who else
0138
      can
0139
      find a way of reconciling
0140
      the reaction of the majority in these two cases? Yes?
0141
     Well I guess
0142
      in the first case where
     you have the one worker and the five
0143
      it's a choice between those two, and you have to
0144
      make a certain choice and people are going to die because of the trolley car
0145
     not necessarily because of your direct actions. The trolley car is a runway,
0146
```

```
0147
      thing and you need to make in a split second choice
0148
      whereas pushing the fat man over is an actual act of murder on your part
      you have control over that
0149
      whereas you may not have control over the trolley car.
0150
      So I think that it's a slightly different situation.
0151
      Alright who has a reply? Is that, who has a reply to that? no that was good, who has a way
0152
0153
      who wants to reply?
0154
      Is that a way out of this?
0155
      I don't think that's a very good reason because you choose
0156
      either way you have to choose who dies because you either choose to turn and kill a person
0157
      which is an act of conscious
0158
      thought to turn,
0159
      or you choose to push the fat man
      over which is also an active
0160
      conscious action so either way you're making a choice.
0161
      Do you want to reply?
0162
      Well I'm not really sure that that's the case, it just still seems kind of different, the act oll
0163
0164
      pushing someone over onto the tracks and killing them,
      you are actually killing him yourself, you're pushing him with your own hands you're pushi
0165
      that's different
0166
      than steering something that is going to cause death
0167
0168
      into another...you know
0169
      it doesn't really sound right saying it now when I'm up here.
      No that's good, what's your name?
0170
0171
      Andrew.
0172
      Andrew and let me ask you this question Andrew,
0173
      suppose
0174
      standing on the bridge
0175
      next to the fat man
0176
      I didn't have to push him, suppose he was standing
0177
      over a trap door that I could open by turning a steering wheel like that
0178
      would you turn it?
0179
      For some reason that still just seems more
0180
      more wrong.
      I mean maybe if you just accidentally like leaned into this steering wheel or something li
0181
0182
     or but,
0183 or say that the car is
```

```
0184
      hurdling towards a switch that will drop the trap
0185
      then I could agree with that.
      Fair enough, it still seems
0186
      wrong in a way that it doesn't seem wrong in the first case to turn, you say
0187
      An in another way, I mean in the first situation you're involved directly with the situati
0188
      in the second one you're an onlooker as well.
0189
0190
      So you have the choice of becoming involved or not by pushing the fat man.
0191
      Let's forget for the moment about this case,
0192
      that's good,
      but let's imagine a different case. This time your doctor in an emergency room
0193
0194
      and six patients come to you
0195
      they've been in a terrible trolley car wreck
0196
      five of them sustained moderate injuries one is severely injured you could spend all day
      caring for the one severely injured victim,
0197
      but in that time the five would die, or you could look after the five, restore them to hea
0198
      during that time the one severely injured
0199
      person would die.
0200
      How many would save
0201
      the five
0202
      now as the doctor?
0203
      How many would save the one?
0204
0205
      Very few people,
0206
      just a handful of people.
0207
      Same reason I assume,
0208
      one life versus five.
0209
      Now consider
0210
      another doctor case
0211
      this time you're a transplant surgeon
0212
      and you have five patients each in desperate need
0213
      of an organ transplant in order to survive
0214
      on needs a heart one a lung,
0215
      one a kidney,
0216
      one a liver
0217
      and the fifth
0218
      a pancreas.
0219
     And you have no organ donors
0220 you are about to
```

```
see you them die
0221
0222
      and then
      it occurs to you
0223
     that in the next room
0224
     there's a healthy guy who came in for a checkup.
0225
      and he is
0226
0227
     you like that
0228
      and he's taking a nap
0229
     you could go in very quietly
0230
     yank out the five organs, that person would die
0231
      but you can save the five.
0232
      How many would do it? Anyone?
0233
      How many? Put your hands up if you would do it.
0234
      Anyone in the balcony?
0235
      You would? Be careful don't lean over too much
      How many wouldn't?
0236
     All right.
0237
      What do you say, speak up in the balcony, you who would
0238
      yank out the organs, why?
0239
      I'd actually like to explore slightly alternate
0240
      possibility of just taking the one
0241
0242
      of the five he needs an organ who dies first
0243
      and using their four healthy organs to save the other four
0244
      That's a pretty good idea.
0245
      That's a great idea
0246
      except for the fact
0247
      that you just wrecked the philosophical point.
0248
      Let's step back
0249
      from these stories and these arguments
0250
      to notice a couple of things
0251
      about the way the arguments have began to unfold.
0252
      Certain
0253
      moral principles
0254
      have already begun to emerge
0255
     from the discussions we've had
     and let's consider
0256
0257 what those moral principles
```

```
look like
0258
0259
      the first moral principle that emerged from the discussion said
      that the right thing to do the moral thing to do
0260
      depends on the consequences that will result
0261
      from your action
0262
      at the end of the day
0263
      better that five should live
0264
      even if one must die.
0265
0266
     That's an example
0267
      of consequentialist
0268
      moral reasoning.
0269
      consequentialist moral reasoning locates morality in the consequences of an act. In the sthe
0270
     world that will result
      from the thing you do
0271
      but then we went a little further, we considered those other cases
0272
      and people weren't so sure
0273
0274
      about
0275
      consequentialist moral reasoning
0276
      when people hesitated
      to push the fat man
0277
0278
      over the bridge
0279
      or to yank out the organs of the innocent
0280
      patient
0281
      people gestured towards
0282
      reasons
0283
      having to do
0284
     with the intrinsic
0285
      quality of the act
0286
      itself.
0287
      Consequences be what they may.
0288
      People were reluctant
0289
      people thought it was just wrong
0290
      categorically wrong
0291
     to kill
0292
     a person
     an innocent person
0293
0294 even for the sake
```

```
0295
      of saving
0296
     five lives, at least these people thought that
      in the second
0297
      version of each story we reconsidered
0298
0299
      so this points
0300
      a second
0301
      categorical
0302
      way
0303
      of thinking about
0304
      moral reasoning
      categorical moral reasoning locates morality in certain absolute moral requirements in
0305
0306
      certain categorical duties and rights
      regardless of the consequences.
0307
     We're going to explore
0308
0309
      in the days and weeks to come the contrast between
      consequentialist and categorical moral principles.
0310
      The most influential
0311
      example of
0312
      consequential moral reasoning is utilitarianism, a doctrine invented by
0313
      Jeremy Bentham, the eighteenth century English political philosopher.
0314
0315
      The most important
0316
      philosopher of categorical moral reasoning
0317
      is the
      eighteenth century German philosopher Emmanuel Kant.
0318
0319
      So we will look
0320
      at those two different modes of moral reasoning
0321
      assess them
0322
      and also consider others.
      If you look at the syllabus, you'll notice that we read a number of great and famous books
0323
0324
      Books by Aristotle
0325
      John Locke
0326
      Emanuel Kant, John Stuart Mill,
0327
      and others.
     You'll notice too from the syllabus that we don't only read these books,
0328
0329
     we also all
0330
     take up
0331 contemporary political and legal controversies that raise philosophical questions.
```

```
0332
     We will debate equality and inequality,
0333
      affirmative action,
0334
     free speech versus hate speech,
      same sex marriage, military conscription,
0335
      a range of practical questions, why
0336
0337
      not just to enliven these abstract and distant books
      but to make clear to bring out what's at stake in our everyday lives including our politic
0338
0339
      lives,
0340
      for philosophy.
0341
      So we will read these books
0342
      and we will debate these
      issues and we'll see how each informs and illuminates the other.
0343
      This may sound appealing enough
0344
0345
      but here
0346
      I have to issue a warning,
0347
      and the warning is this
     to read these books
0348
0349
      in this way,
      as an exercise in self-knowledge,
0350
0351
      to read them in this way carry certain risks
0352
      risks that are both personal and political,
0353
      risks that every student of political philosophy have known.
0354
      These risks spring from that fact
0355
      that philosophy
0356
      teaches us
0357
      and unsettles us
0358
      by confronting us with what we already know.
0359
      There's an irony
0360
      the difficulty of this course consists in the fact that it teaches what you already know.
0361
      It works by taking
0362
      what we know from familiar unquestioned settings,
0363
      and making it strange.
0364
      That's how those examples worked
0365
     worked
     the hypotheticals with which we began with their mix of playfulness and sobriety.
0366
      it's also how these philosophical books work. Philosophy
0367
0368 estranges us
```

```
0369
      from the familiar
0370
      not by supplying new information
      but by inviting
0371
      and provoking
0372
0373
      a new way of seeing
      but, and here's the risk,
0374
0375
      once
0376
      the familiar turns strange,
0377
      it's never quite the same again.
0378
      Self-knowledge
0379
      is like lost innocence,
0380
      however unsettling
     you find it,
0381
0382
      it can never
0383
      be unthought
0384
      or unknown
      what makes this enterprise difficult
0385
      but also riveting,
0386
      is that
0387
      moral and political philosophy is a story
0388
      and you don't know where this story will lead but what you do know
0389
0390
      is that the story
0391
      is about you.
0392
      Those are the personal risks,
0393
      now what of the political risks.
0394
      one way of introducing of course like this
0395
      would be to promise you
0396
      that by reading these books
0397
      and debating these issues
0398
      you will become a better more responsible citizen.
0399
      You will examine the presuppositions of public policy, you will hone your political
0400
      judgment
0401
      you'll become a more effective participant in public affairs
0402
      but this would be a partial and misleading promise
0403
      political philosophy for the most part hasn't worked that way.
     You have to allow for the possibility
0404
0405 that political philosophy may make you a worse citizen
```

```
0406
      rather than a better one
0407
      or at least a worse citizen
      before it makes you
0408
      a better one
0409
      and that's because philosophy
0410
      is a distancing
0411
0412
      even debilitating
0413
      activity
0414
      And you see this
0415
      going back to Socrates
0416
      there's a dialogue, the Gorgias
      in which one of Socrates' friends
0417
0418
      Calicles
0419
     tries to talk him out
0420
      of philosophizing.
      calicles tells Socrates philosophy is a pretty toy
0421
      if one indulges in it with moderation at the right time of life
0422
      but if one pursues it further than one should it is absolute ruin.
0423
0424
      Take my advice calicles says,
0425
      abandon argument
      learn the accomplishments of active life, take
0426
      for your models not those people who spend their time on these petty quibbles,
0427
      but those who have a good livelihood and reputation
0428
0429
      and many other blessings.
0430
      So Calicles is really saying to Socrates
0431
      quit philosophizing,
0432
      get real
0433
      go to business school
0434
      and calicles did have a point
0435
      he had a point
0436
      because philosophy distances us
0437
      from conventions from established assumptions
0438
      and from settled beliefs.
0439
     those are the risks,
0440
      personal and political
      and in the face of these risks there is a characteristic evasion,
0441
0442 the name of the evasion is skepticism. It's the idea
```

```
0443
      well it goes something like this
      we didn't resolve, once and for all,
0444
      either the cases or the principles we were arguing when we began
0445
      and if Aristotle
0446
      and Locke and Kant and Mill haven't solved these questions after all of these years
0447
      who are we to think
0448
      that we here in Sanders Theatre over the course a semester
0449
0450
      can resolve them
0451
      and so maybe it's just a matter of
0452
      each person having his or her own principles and there's nothing more to be said about
0453
      it
0454
      no way of reasoning
0455
     that's the
0456
      evasion. The evasion of skepticism
      to which I would offer the following
0457
0458
      reply:
0459
      it's true
      these questions have been debated for a very long time
0460
0461
      but the very fact
0462
      that they have reoccurred and persisted
0463
      may suggest
0464
      that though they're impossible in one sense
0465
      their unavoidable in another
0466
      and the reason they're unavoidable
0467
      the reason they're inescapable is that we live some answer
0468
      to these questions every day.
0469
      So skepticism, just throwing up their hands and giving up on moral reflection,
0470
      is no solution
0471
      Emanuel Kant
0472
      described very well the problem with skepticism when he wrote
0473
      skepticism is a resting place for human reason
0474
      where it can reflect upon its dogmatic wanderings
0475
      but it is no dwelling place for permanent settlement.
0476
      Simply to acquiesce in skepticism, Kant wrote,
0477
      can never suffice to overcome the restless of reason.
      I've tried to suggest through theses stories and these arguments
0478
0479 some sense of the risks and temptations
```

0480	of the perils and the possibilities I would simply conclude by saying
0481	that the aim of this course
0482	is to awaken
0483	the restlessness of reason
0484	and to see where it might lead
0485	thank you very much.
